::

H. H. KNIGHT
Ames, Iowa

Greetings to Glad Fans Everywhere

The 1949 growing season in central Iowa was one of the best; rainfall came well distributed and sufficient to make fine growth. With a near record corn crop produced in Iowa, the Gladiolus crop was likewise exceptional. Good rains (3.5 inches) during the first ten days of September came just right to make one of the best bulb crops we can remember. This was followed by a dry, warm October which was perfect for completing growth of the bulbs, free of disease, and perfect conditions for harvest. There is nothing like good soil, just the right amount of moisture and plenty of sunshine to produce heavy, high crowned bulbs. Step forward folks, we have them this year.

To arrive at the proper price for bulbs of many varieties is always a problem. We try to use the lowest quotations found in the better catalogues issued; if still too high we will meet the prices of reliable growers, so long as our stock lasts. Beyond this the differences in values received may be found in quality of bulbs, in overcount and extras. Perhaps the best way to find out is to place a trial order.

CLASSIFICATION NOTE

The North American Gladiolus Council classification places Glads in size divisions as follows: Miniature, 100 series; Small Glads, 200 series; Medium, 300 series; Large, 400 series; Giant, 500 series. The color class is indicated by the last two digits. For experimentation see classified list published by the North American Gladiolus Council. Every Glad grower should have this list which is a key to information on the size and color classes of varieties.

JOIN THE NORTH AMERICAN GLADIOLUS COUNCIL

An international organization sending to its members quarterly size Bulletins with much information of interest; also the Annual Classification of Gladiolus Varieties.

Subscription member\$1.50 per year

Send to membership Secretary, Alfons Bazdorf, Lincoln Park, N. J. Join the Iowa Gladiolus Society and receive "Glad Tidings." Send \$1.50 to Sec. Wm. H. Collins, State House, Des Moines, Iowa, and receive Glad Tidings, Bulletin of the N. Am. Gladiolus Council and Classification of Varieties.

THRIPS CONTROL MADE EASY

During the 1946 season we carried out experiments in the control of Thrips on bulbs and plants, using DDT in dust form. The first publication on results of controlling thrips in field plantings appeared in our article "Hello Dust, Good-bye Spray" in the Sept. (1946) Bulletin of the North American Gladiolus Council. We are now completely sold on the use of dust for its effectiveness, convenience and ease of application. We recommend using 5% strength of DDT dust, compounded from "Deenate," a 50% wettable DDT powder, using a fine grade of talc as the diluent base. 5% DDT dust is now on the market in many places.

Treat the bulbs soon after harvest while drying by blowing the dust over and through the trays of bulbs or other containers. A small hand gun holding a pint or less of dust is most convenient for the purpose. Small lots of bulbs may be treated by placing bulbs and dust in large paper bags and shaking gently. Bulbs so treated will be protected against roving thrips since the insects will be killed as fast as they contact the dust. DDT residue will not injure the bulbs. Protecting the growing plants is best done by using the same 5% DDT dust, blowing it on the plants with a dust gun at weekly intervals. Keep it up until September if you want good late blooms. We have checked enough results to find this program is more efficient than tartar emetic sprays or other insecticides used in the past. DDT liquid sprays are also effective but the labor saving advantages of using dust will eventually result in most growers discarding the sprayers in favor of dusting machines. We have used a Root hand gun duster of a size holding about four pounds of dust, shoulder strap supported and with hand crank, covering one acre of Glads with dust in two hours. **Warning:** If you do much dusting you should provide yourself with a respirator or gas mask. Breathing much dust will cause headaches and possibly more serious troubles.

DISEASE CONTROL

We use and recommend "New Improved Ceresan" as a dip at planting time. If you grow many Glads or expect to continue growing them it is necessary to dip the bulbs in a disinfectant just before planting. Use 1 oz. of N. I. C. in 3 gals. of water and add 3 teaspoons of Dreft as a wetting agent, or a brand of Spread-Sticker. Do not use bare hands to mix concentrated N. I. C. First make a paste of the powder then add larger volume of water. Soak bulbs and bulblets for 30 minutes, then drain off the liquid and

plant while still damp. On large bulbs one may break the husks to help penetration but do not remove as the husks act like a sponge to hold and carry the disinfectant for many days, and so better protect the new bulb and rootlets. One batch of N. I. C. mix may be used four or five times without losing too much strength, but then it is time to discard or add fresh mix of N. I. C.. We have shown in earlier publication that N. I. C. will kill thrips on the bulbs at time of dipping, provided the husk is wet through in the soaking process. You should not have the thrips to worry about provided you treated the bulbs with DDT dust in storage.

If more convenient for the small grower, use Lysol which may be obtained at most drug stores. Soak bulbs and bulblets for 3 hours, just before planting in a solution prepared at the rate of 1 teaspoonful of Lysol to 1 quart of water. Allow to drain for 30 minutes and plant bulbs and bulblets while still wet.

HAROLD K. (Knight-Gove, 1949)

(Red Gold X Giant)

A mammoth, deep scarlet (Dutch vermilion) glad for the exhibitor and home garden, the lower florets of which may attain 7 inches in diameter. (Classification 536). The giant plants of perfect proportions may stand 6 feet in height with flower head up to 30 inches in length; strong straight spikes, 20 to 22 buds, 7-8 open florets with 8 more showing color, having strong attachment and perfect placement. The florets are of very heavy substance, velvety texture, edges finely ruffled, and do not wilt in hot sunshine. This is a good seed parent while the anthers produce viable pollen. Good propagator of large bulblets which germinate readily; makes fine large bulbs which have good disease resistance. Foliage of deep green color; the giant plants put out 10 leaves before the flower spike appears. Blooms in 85-87 days.

Grand Champion Single Spike and Best Three Spikes in the show, Ames, Iowa, 1948, unanimous decisions by four judges. Won 4 AA (1947) and 2 AA (1948) ratings by judges in the N.A.G.C. Trial Gardens. Received "Approval Award" of the Canadian Gladiolus Growers' Council, 1948.

Again, in 1949, HAROLD K. won as Best Three Spikes in the Ames, Iowa, show; also was Division winner in Three Spikes at the Iowa State Show, Waterloo. See the front cover for picture of HAROLD K. as it grows in the originator's garden, with yours truly looking up.

This grand gladiolus is named as a living memorial to my son, Lieut. Harold K. Knight, who lost his life in service of our country, March 1945. He won the Lieutenant's commission in three different branches of the service; first in the Artillery, next in the Infantry, then volunteered for transfer to the Paratroop Corps where he again won a commission under most rigid competition. He had a record of 15 parachute jumps without mishap, only to meet an untimely end by what was reported as an accidental discharge of a gun.

RED GOLD (Knight, 1949)

(White Gold X Myrna)

A light red that draws attention, an unusual shade of high color value, (Signal red; see plate 719 of British Royal Hort. Society Color Chart) different from anything we can name. Classification 550. A giant size plant with form of flower and substance similar to the parent, White Gold. Plants range from 50 to 60 inches in height, flower-head 24 to 27 inches, opens 7 florets with 6 buds in color on a 20 bud spike. Florets wide open, 5½ to 6½ inches in width, of heavy substance, finely ruffled, lower petals neatly ribbed, perfect placement. Jay Dittman said: "A beautiful gladiolus, opens well in water and a good keeper when cut." Blooms in 80 days (range 77 to 83 days). Foliage healthy, deep green in color, leaves very broad. Makes fine healthy bulbs that are a joy to clean; good propagator, germination excellent.

In the above cross all the seedlings were white or cream except two, Red Gold and a light orange. As the name suggests this new gladiolus resembles White Gold but is light red in color; the florets have the same heavy substance, but with good culture and moisture, will carry 20 buds where White Gold shows 16. Red Gold has one fault in common with White Gold; under dry conditions the flower heads may shorten somewhat, but still useful as cut flowers. The past year we found our local florists liked Red Gold the best of all the reds we grew. Red Gold has been a winner at the shows; Best Three Spikes at the Iowa State Show, Cedar Rapids, 1945, and given a score of 87¼ points. Best Single Spike Seedling at Iowa State Show, Sioux City, 1948, with a score of 89 on the N.A.G.C. score sheet; judged by J. Elton Carter and John Redding.

HIHO (Knight, 1948)

(Ogarita X Wings of Song)

Color a clear deep rosy salmon, throat clear white without markings, never flecks. Florets 5 to 5½ inches, petal margins waved; opens 8 to 10 florets on a 30 inch flower-

head; classification 432. This is an improvement in clear color tone over the parent **Ogarita** which it resembles in tall vigorous growth; overall height about 65 inches. Good growth conditions produce 30 inch flowerheads of 20-22 buds, while well grown plants have made 36 inch flowerheads with up to 24 buds. Spikes do not crook, will hold 8 florets open with six in color in the field, and taken indoors will open ten. Good propagator of large bulblets which germinate readily, making fine clean bulbs which have shown no tendency for disease. Blooms in 78-83 days.

Best seedling and Grand Champion single spike of the show at Ames, 1944. Best three spike seedling in 400 Division at the Iowa State show, 1947. Longest flowerhead, 35 inches, at the Sioux City show, 1946. Mrs. Feye brought a spike to the Algona show having a 38 inch flowerhead and carrying 26 buds. This one will always be a contender for longest flowerhead at the shows.

Walter Krueger says of **HIHO**: "This tall descendent of **Ogarita** with its vivid pink color and large cream white inner floret areas did very well here from all sizes of stock. Bulblet bloom exceeds that of many varieties grown from large bulbs."

Winston Roberts said: "One of the real standouts in our planting of new varieties last summer was this beautiful pure pink glad. It has a conspicuous and pleasing white center that blends nicely with clear pink background. A sturdy grower, it combines vigor with grace and beautiful color."

FUCHSIA MAID (Knight, 1946)

A true fuchsia color, between deep wine red and purple, with heavy substance and depth of color that glows in the sunshine. Strong wiry stems, 16 buds, 6 open, 4 to 4½ inch florets, double row placement. Produces large bulblets which germinate readily. Blooms in 73 days. An unusual shade of color that attracts attention; this is the reason for introduction. It was Best Seedling at the Ames Show of 1943. This rich colored gladiolus is favored by florists to use in mixed bouquets and as a contrast color to go with white, cream or yellow.

ROSY RED (Knight, 1945)

Color deep rosy red, a glowing lively shade in solid color and heavy substance; throat petals with an inconspicuous pale line. Medium height but produces strong willowy spikes, 16 buds on a 24 inch flower head, seven florets open and five showing color; lower florets average about 4¼ inches. Does not crook under 100 degree temperatures. Remarkable for fine bulb characteristics which is exceptional among reds; produces an abundance of large bulblets from small or large size bulbs; blooms freely from bulblets where moisture supply is adequate. Disease resistant; we have had less than 1% loss from all causes in six years' growing experience. A fine cut flower for those who like red, and this shade of red is different. Blooms in 65-70 days. It will bloom with *Annamae* to produce the earliest cut flowers; the florists like it very much.

ELIZABETH THE QUEEN (Selected tall strain)

We have a selected strain of *Elizabeth the Queen*, descended from bulblets produced by our Champion spike of 1943. Each year since this selected strain has produced division winners in one or more shows. In 1947 the Grand Champion single spike of the Iowa State Show was *Elizabeth the Queen*, grown and exhibited by Mrs. Etta Feye, and the bulb came from our selected strain. This was a magnificent spike with 30 inch flowerhead, 22 buds with ten florets open. Yes, grown better than we have been able to do, although our show spikes have run 27 inch flowerheads with 21 buds. We had a 90 ft. row of blooming plants which showed very uniform spikes and habits of growth, nearly all blooming at the same time. Several growers agree this special selection runs distinctly taller than stock they grow or have seen in this general region. Again, in 1949, this was a single spike Division winner for us at the Ames Show. It was runner-up to *Pandora* the Grand Champion.

From Wyoming comes word: "Last year I tossed out all my bulbs of *Elizabeth the Queen* and swore 'never again'. But, thanks to you, there is now facing me across the room a perfect spike of *Elizabeth*. I'm right proud of it, and I want you to know I really think you have something in your 'Selected strain'. I'm certainly hoping to increase our stock of it another year."—Max Hughes.

CORONA (Selected strain)

Most stocks of *Corona* have a good percentage of plants which produce cream colored flowers without the pink halo margins. In 1944 we segregated from such a mixed stock of *Corona*, three tall growing plants having the desirable rose-pink margins on the florets. Now, after five growing seasons, this stock continues blooming true to the deep color. This year we are offering a few bulbs of this strain at premium prices, believing that the increase of this stock will eventually replace older stocks that are showing deterioration.

TERMS

Minimum mail order \$3.00. Orders at retail prices prepaid; wholesale and the 100 rate not prepaid. Cash before delivery. Over count on retail orders. Ten bulbs at 8 times the single rate; 5 bulbs at half the 10 rate. No single item for less than minimum as stated; "3-.15" means three bulbs for .15 and that is a minimum item. Bulblet prices per 100 may be broken down to 25 bulblets for one-fourth the 100 rate. All stock offered is subject to supply and previous sales. EXTRAS on cash orders at retail prices: From \$5.00 to \$10.00 select 10% extra; for orders above \$10.00 and up to \$25.00 select 15% extra; for orders above \$25.00 select 20% extra. These discounts do not apply to collections, special offers, wholesale prices, or new introductions.

Our bulb stocks have been doubly inspected and certified by the State Entomologist's office, Certificate No. 149.

GENERAL BULB LIST

	Large	Med.	Small	Bulblets Per
400 ANNAMAE (Pom) best early pure white; fine commercial	2, .20			
378 ABU HASSAN (Holland) dark violet-blue, good performer, straight spikes	2, .25	3, .20		pkg. .25
560 ASTRID (Ja) very fine medium rose, heavy substance, resistant to heat	.35	.25	2, .20	10, .25
236 ATOM (Hed) clear vermillion color with silver edge; one of best small ones	.50	.35	.25	10, .50
440 BEAUTY'S BLUSH (Fic) lovely soft blush pink, tall 20 bud spikes; fine commercial	.20	2, .30	2, .20	100, 1.50 10, .20
530 BENGASI (Cave) huge ruffled pink, heavy substance; does best in cool climates	.25	.15	2, .20	100, 2.00 10, .20
560 BERNADETTE (Silva) new light rose sport of Picardy; very fine cut flower	.50	.35	.25	100, 2.00 10, .25
362 BETTY'S CHOICE (Har) ruffled rosy mauve, cream throat, petals edged cream, 6-8 open florets on tall spike	2, .30	3, .25	5, .25	25, .25
552 BIRCH RED (Rich) pure deep red, fine grower, popular choice, show winner	1.00	.75	.50	100, 5.00 4, .25
554 BLACK CHERRY (Rich) early tall black red, opens 8-10, show winner in giant size	3.00	2.00	1.00	10, 2.00 1, .25
554 BLACK PANTHER (Lins) another giant black red, great show winner	.35	.25	2, .25	10, .25
478 BLUE LAGOON (Sny) new deep violet, tall strong grower, show winner	.75	.50	.35	10, .50 3, .20
343 BOISE BELLE (Rob) distinctly different and lovely; florets light yellow, edges pink; 8-10 open		1.50	1.00	1, .25 10, 1.75
533 BOLDFACE (Ev) striking deep salmon, small red blotch on white throat	1.00	.75	.50	10, 1.00 2, .25
582 BOLERO (Le) unusual ruffled orange with brown blotch; attracts attention	2, .25	4, .25		25, .25
491 BRAZIL (Grout) ruffled rich salmon smoky with crimson blotch; attractive, distinct	.75	.50	.25	5, .25
562 BURMA (Pa) heavily ruffled deep rose, best in this color class	2, .25	4, .25	6, .25	50, .25
541 CHANTILLY (Graff) LaFrance pink with slight blotch; opens 10 florets on tall spike	2.50	1.75	1.00	10, 2.50 1, .30
491 CHOCTAW (Wils) light chocolate with deeper blotch, opens 10 on a tall straight spike	1.50	1.00	.60	2, .25 10, 1.00
500 CHRISTINE (Cave) giant marble white, heavy substance, show winner	1.50	1.00	.50	2, .25
316 COLOR MARVEL (Kru) lovely buff orange and yellow blend; strong grower	.15	2, .20	4, .20	100, 1.00 10, .15
441 CONNECTICUT YANKEE (Shn) sensational pink, perfect form, great show winner	.50	.35	.20	100, 4.00 10, .50
506 CONNIE G. (Woods) very beautiful clear cream, yellow lip petal, ruffled and fluted		3.00	2.00	1, .50
560 CORONA (Pa) (Selected strain) increase from a single tall plant with typical rose halo; propagated true four years without cream sports showing; fine vigorous growth; stock limited	.25	.20	.15	10, .25

		Large	Med.	Small	Bulblets Per	
410	CRINKLECREAM (Ellis) large ruffled clear medium yellow; fine cut flower	2, .20	3, .20	4, .20	100, .50 40, .25	
570	CROWN ORCHID (Almey) deep toned orchid lavender, opens 7 on tall spike		.50	.35	2, .15 10, .60	
240	DAINTY MISS (St) light pure pink, opens 6-8 of 15 buds on balanced spike	.15	3, .20	3, .15	10, .25	
560	DAWN GLOW (Jack) long flower spike, beautiful light rose pink, winner	.25	.15	3, .20	25, .25	
462	DIADEM (Lines) faintly fragrant pale rose, deeper rose edges, opens 8-10 florets, good performer	2.00	2.00	2.00	2, .25 10, 1.00	
340	DONELLA (Wr) very early cut flower, pink, opens 6 florets and blooms freely from small bulbs	2, .30	2, .20	3, .25	40, .25	
470	DOROTHY ARMSTRONG (Beard) fine new rosy purple, 6-8 open florets, tall strong grower	.50	.35	.25	10, .50	
340	DREAM CASTLE (Lins) light coral pink, cream throat, opens 10 on perfect spike	.50	.35	.25	10, .50	
460	DREAM GIRL (Kru) light rose pink, opens 7 of 18 buds on tall spike; consistent spiker	.50	.35	.25	10, .50	
516	DR. WHITELEY (Ril) fine buff apricot, tall strong grower	2, .20	3, .20	5, .15	50, .25	
540	EGLANTINE (Sch) most beautiful ruffled pink, some short spikes, slow propagator	1.50	1.00	.75	3, .35	
566	ELIZABETH THE QUEEN (Selected strain) averages a foot taller than ordinary stocks; stock limited, read about this in introduction	.35	.25	.20	4, .25 10, .50 100, 3.00	
560	EVANGELINE (Pa) beautiful light rose, great show winner	2.50	1.50	1.00	10, 1.60 1, .20	
443	FABULOUS (Las) fine blotched pink, very attractive; opens 6 on a tall spike	.50	.35	.25	8, .25	
440	FAY (Jack) pink with cream throat, opens 7 on medium tall spike; early cut flower	2, .25	4, .25	10, .25	pkg. .25	
436	FIREBIRD (Kuh) clear brilliant scarlet, 7 open ..	.50	.35	.25	5, .25	
586	FLYING FORTRESS (Wils) huge lavender gray, with attractive scarlet blotch, show winner	.20	.15	2, .20	25, .25	
401	FREEDOM (Fic) tall rugged white, heavily ruffled, bright rose throat blotch	1.00	.75	.50	4, .25 10, .50	
442	FRIENDSHIP (Fic.) lovely light pink, opens 6-7 ruffled florets; early free bloomer		.75	.50	4, .25	
462	FUCHSIA BELLE (Alm) tall deep reddish rose ..	.50	.35	.25	10, .25	
370	FUCHSIA MAID (Knight) true fuchsia color, early cut flower; attractive, distinctive	.25	.20	.15	100, 2.00 10, .30	
512	GARDEN GOLD (Rich) new giant deep yellow; coming show flower	4.00	3.00	2.00	1, .40 10, 3.00	
432	GENGHIS KHAN (Sch) heavily ruffled deep salmon; opens 7 on straight spike	3, .25	5, .25	10, .25	pkg. .25	
410	GLEAM (Fic) ruffled light yellow, heavy substance, show winner	.35	.25	2, .30	10, .25	
510	GOLDEN ARROW (Pru) clear light yellow, tall spikes, 8 open; good commercial	.25	2, .25	4, .25	15, .25	
412	GOLD LODE (Wils) tall deep yellow, fine form; good performer, stock scarce	1.00	.50	.25	5, .25	
516	GOLD MEDAL (Beard) giant yellow with buff tones; tall spikes, show winner	1.00	.75	.50	10, 1.00 2, .25	
424	GRATITUDE (Fic) salmon-orange with deep yellow throat; fancy ruffles, tall spikes	2, .30	3, .30	4, .30	15, .25	
476	GREAT LAKES (Kuh) clear light blue, opens 7 on 20 bud spike; tall, fine performer	.30	.25	.20	10, .25	
536	HAROLD K. (Knight) largest and best deep scarlet; mammoth round florets 7 inches in diameter with perfect attachment, heavy substance and velvety texture; 6-7 open of 21 buds on 30 inch flower head	3.00 10, 24.00	2.00 16.00	1.50 12.00	1, .50 10, 3.00	
540	HEART'S DESIRE (Fiedler) very beautiful, ruffled pink, cream throat; fine performer, coming commercial	1.25	1.00	.75	10, 1.20 2, .30	

	Large	Med.	Small	Bulblets Per
436 HIAWATHA (Beard) pure scarlet, opens 8 on a good spike; show winner	2.00	1.50	1.00	10, 2.00 1, .25
432 HIHO (Knight) deep salmon with clear throat; tall spikes, 20 buds, 9 open	1.50 10, 12.00	1.00 8.00	.50 4.00	2, .30 10, 1.20
491 HULA HULA (Wils) orange gray smoky, violet orange blotch, tall strong grower	1.50	1.00	.60	2, .25 10, 1.00
466 HUNTRESS (Jack) new early lavender of great merit; cut flower, in demand	2, .30	3, .25	4, .20	25, .25
420 JANET LEE (Fair) orange peach blending to cream throat, strongly ruffled; show winner	1.25	.75	.50	10, .75 3, .25
441 JUNE DAY (Rob) very early pure pink with small cherry blotch; coming commercial	.75	.50	.30	10, .50
530 KELSEY (Yates) light salmon Picardy sport, tall and vigorous	.30	.15	3, .25	10, .30
532 KING ALFRED (Hobs) tall giant salmon with golden throat; fine performer, show winner	.25	.20	2, .25	20, .25
590 KING TAN (Wils) tall rosy tan, fine spike, regular show winner	3, .25	4, .25	6, .25	40, .25
433 LADRONE (Pa) light rose doree, shading to deep salmon, yellow blotch	.35	.25	2, .25	20, .25
400 LADY ANNE (Buc) large new white, very early, fine commercial prospect	.35	.25	.15	10, .35
340 LADY BOO (Graff) pure shade of shell pink, perfect spike; coming commercial	.25	.15	2, .20	100, 2.00 10, .25
540 LADY LUCK (Har) light salmon Picardy sport, a beauty; in demand	2, .25	4, .25	10, .25	pkg. .25
506 LAKE PLACID (Wils) creamy white, butterfly florets, long flowerhead; good commercial			3, .25	15, .25
470 LANCASTER (Pa) grand new purple, winner at the shows; coming commercial	.20	2, .20	3, .20	100, .50 15, .25
366 LAVENDER & GOLD (Ba) beautiful medium size lavender with gold throat; cut flower	3, .25	4, .25	10, .25	pkg. .25
466 LAVENDER PRINCE (LaS) tall mauve lavender, good cut flower; fine performer	2, .20	2, .15	3, .15	100, .60
506 LEADING LADY (Joh) cream sport of Picardy; great show winner and commercial	2, .20	4, .25	10, .25	pkg. .25
432 MADELEINE BROWN (Mai) fine salmon, regular performer, resembles Picardy	.15	2, .20	3, .15	100, .50 25, .20
570 MARGARET WOOD (Mar) deep wine purple, attracts attention; in demand	2, .30	3, .25	5, .25	pkg. .30
400 MARY ODELL (Cave) fine white, open 8 on perfect spike; winning show flower	.75	.50	.35	10, .50 3, .20
462 MEXICALI ROSE (Wils) deep rose, ruffled, tall vigorous growth; show flower	1.00	.60	.35	12, 1.00 3, .25
552 MID-AMERICA (Knier) giant medium red that opens up to 9 on tall spike, show winner	.20	.15	2, .20	10, .20
552 MIGHTY MONARCH (Butt) giant red, opens 7 on tall spike, heavy substance	.35	.25	.15	10, .25
566 MINSTREL (Pa) great ruffled lavender, good attachment; winning show flower	.25	2, .25	3, .25	10, .25
460 MISS WISCONSIN (Kru) medium rose, great show flower; in demand as commercial	.20	2, .25	3, .25	12, .25
586 MISTAYA (Ketch) lavender gray sport of R. B.; good performer	.40	.25	2, .25	12, .25
500 MOUNT KOSCIUSKO (Both) giant florets of pure white; good propagator; show flower	.65	.50	.35	3, .25
